Bespoke consultancy

Our comprehensive consultancy service covers microbiological and environmental testing of customers manufacturing facilities. We will advise on clean room GMP compliance in your manufacturing facilities, operator training, environmental monitoring and water sampling. We can give advice and will design specific test protocols. By working together, we can also help you to reduce costs and minimise the inconvenience of routine testing. Each product has its own characteristics and sterilization criteria. We work with our clients to provide the most appropriate solution tailored to the needs of the product and the application. Our fully equipped and accredited laboratory facilities at South Marston, Thorne, Tullamore and Malaysia routinely provide comprehensive microbiological test and consultancy services to a range of manufacturing industries:

- sterilization validation to ISO11135, ISO11137 and EN550 and EN552
- product TVC/bioburden analysis
- organism identification
- preservative efficacy (challenge) testing
- sterility testing
- limulus (LAL) endotoxin testing
- packaging integrity testing.

Consultancy services include:

- cleanroom monitoring
- environmental/water/liquid monitoring
- operator training
- facility microbiological audit

These lists are not exhaustive. Please contact us for advice on specific requirements.
